Art Unit: 2654

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 35-93, drawn to Electrical Audio Signal Processing Systems And Devices; Hearing Aids, Electrical; Spectral Control, classified in class 381, subclass 320.
 - II. Claims 94-103, drawn to Artificial Larynx, Electrical; Acoustical Noise or Sound Cancellation; Acoustic, Non-airborne Vibration Sensing or Counterwave Emission; From Appliance, classified in class 381, subclass 71.3.
 - III. Claims 104-111, drawn to Data Processing: Speech Signal Processing, Linguistics, Language Translation, & Audio Compression/Decompression; Speech Signal Processing; Recognition; Word Recognition; Specialized Models; Natural Language, classified in class 704, subclass 257.
- 2. The inventions are distinct, each from the other because of the following reasons:
- Inventions I & II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a device that outputs the sound information to a user is not required when the sound is from the user. The subcombination has separate utility such as providing latent storage of speech to accompany text messages or multimedia presentations.

Art Unit: 2654

- Inventions I & III are related as combination & subcombination (MPEP § 806.05(c)).
 In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the input of assistive hearing does not require separately generated speech information. The subcombination has separate utility such as to transcribe speech into text.
- Inventions II & III are related as combination & subcombination (MPEP § 806.05(c)).
 In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the synthesized speech products are output and so do not require subsequent speech recognition to comprehend a semantic meaning in the speech that was generated. The subcombination has separate utility such as to control devices by speech commands.
- 3. Furthermore, should Group I be elected, a further election of species from within that group is required because claims 35-52, 53-82 and 83-93 are generic to a plurality of disclosed patentably distinct species as follows:
 - I A. Claims 35-52, drawn to Electrical Audio Signal Processing Systems And Devices; Hearing Aids, Electrical; Spectral Control, classified in class 381, subclass 320.
 - I B. Claims 53-82, drawn to Surgery Surgically Implanted Vibratory Hearing Aid, classified in class 600, subclass 25.
 - I C. Claims 83-93, drawn to Data Processing: Speech Signal Processing, Linguistics, Language Translation, & Audio Compression/Decompression; Speech Signal Processing; Recognition; Speech to image, classified in class 704, subclass 235.

Art Unit: 2654

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II III and the search required for Group II is not required for Group III and the search required for Group IA is not required for Groups IB & IC and the search required for Group IB is not required for Groups IC, restriction for examination purposes as indicated is proper.
- 5. A telephone call was made to Mr. Tadashi Horie on 27 February 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2654

6. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Daniel A. Nolan at telephone (703) 305-1368 whose normal business hours are Mon, Tue, Thu & Fri, from 7 AM to 5 PM.

If attempts to contact the examiner by telephone are unsuccessful, supervisor Richemond Dorvil can be reached at (703)305-9645.

The fax phone number for Technology Center 2600 is (703)872-9314. Label informal and draft communications as "DRAFT" or "PROPOSED", & designate formal communications as "EXPEDITED PROCEDURE". Formal response to this action may be faxed according to the above instructions,

or mailed to:

P.O. Box 1450

Alexandria, IIIA 22313-1450

or hand-deliver to: Crystal Park 2,

2121 Crystal Drive, Arlington, IIIA,

Sixth Floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to Technology Center 2600 Customer Service Office at telephone number (703) 306-0377.
